Processing Codes

Table of Contents

Introduction

This section provides tables that assist you in defining your system, submitting your data, correcting errors or FAFSA data, and other processing codes associated with the Central Processing System (CPS) Electronic Data Exchange (EDE) process.

Summary of the Tables in this Section

In this section, you will find several tables to assist you when reviewing files.

2007-2008 ISIR Cross-Reference

This table is a cross-reference of the 2006-2007 Institutional Student Information Record (ISIR) field number, start position, and end position with the 2007-2008 ISIR field number, start position, and end position. It also lists the field values (for each field) that have changed from the last award year.

Table of Reject Codes and How to Respond to Each

Use this table to determine the meaning of each reject code possible on a Student Aid Report (SAR) or ISIR. The table also outlines how to correct each reject and references comment code numbers associated with the rejects.

Record and Transmission Error Messages

This table reports the Record Reject codes (3 to 16) and the Transmission Error codes (17 to 18). The table lists the actual text for each reject code, a description of the error, and a resolution for each error. The record error messages indicate that the individual student record was not processed. You will need to fix any student record with a record error message and send it to the Central Processing System (CPS) again for processing so an ISIR is generated. Transmission errors are problems with the transmission of the records.

Assumption Overrides

This table associates the override codes with the assumption the CPS is making during processing. It also explains what happens if you use this code and provides an example of when you would use this code.

Field Name and Position Cross-References

Use this table to determine which fields were verified or corrected in the previous transaction or which fields are highlighted on the ISIR. It also defines the field positions for the SAR field, the FAFSA field name, and the question number on the FAFSA.

NSLDS Loan Program Codes

Use these codes to determine the type of loan program of up to six loans in the NSLDS portion of the ISIR Record Description/Data Dictionary found in the Record Layouts section of this technical reference.

NSLDS Loan Current Status Codes

Use these codes to determine the current status of any of the loans (up to six) in the NSLDS portion of the ISIR Record Description/Data Dictionary, which is found in the Record Layouts section of this technical reference.

State/Country/Jurisdiction Codes

Use this table to determine the valid state abbreviations used for the following fields found throughout the Record Layouts section of this technical reference:

- Student's Permanent State
- Student's Driver's License State Code
- Student's State of Legal Residence
- Parents' State of Legal Residence

Correction Data Entry Specifications

You may use this table in conjunction with the Correction Export Record Layout found in section 3, Record Layouts. The table defines the CPS Correction Number and field length. It defines what data is valid to send for each field on a correction record. The table also indicates if the CPS Correction Number field is a signed value, the justification of the field, and if the field can be corrected to blank.

Message Classes

This table lists the message classes associated with application processing.

Comment Codes
